SUMMARY

System & Backend Developer with a strong focus on building secure and efficient architectures. Capable of handling everything from low-level system optimizations to scalable backend infrastructure. Known for a disciplined approach to problem-solving and a commitment to delivering stable, high-quality software that meets complex technical requirements. Recognized for consistent performance and technical excellence in high-stakes environments.

EXPERIENCE

Software Developer — Conspicuous Solutions (Startup)

May 2025 – Present

- Delivered system-level Android applications with continuous background execution, automated scheduling via Services and Workers, and elevated system permissions — ensuring reliability in real-world deployment scenarios
- Built an automated platform for live content delivery with intelligent fallback mechanisms, touch-detection playback control, kiosk-style device behavior, and hourly usage analytics
- Optimized application performance and memory stability by refactoring UI flows, implementing RecyclerView with multiple adapter types, and resolving lifecycle and background execution edge cases
- Implemented secure data handling using encryption techniques, Firebase Firestore integration, and structured database design across mobile and backend layers
- Designed and deployed an offline-first communication system over WiFi mesh network with self-hosted MongoDB on Linux, including IP binding, firewall configuration, and Electron desktop client
- Configured private remote access infrastructure using Dockerized RustDesk server with public-key encryption and Dynamic DNS, eliminating cloud dependency and ensuring full data ownership
- Automated CI/CD pipelines and deployment workflows, reducing manual effort and maintaining consistency across development environments
- Built a security-hardened Android application incorporating defensive mechanisms to protect critical application logic and prevent tampering.
- Specialized in System-Level Android Engineering and Embedded Security, focusing on building hardened AOSP distributions with custom kernel optimizations and secure boot architectures to ensure hardware-level data integrity.

SKILLS

Languages: Android (Java) , Python , C , C++ , SQL , JavaScript

Frontend & Backend Infrastructure: Node.js, RESTful APIs, Self-hostings , Linux Deployment, Docker, WSL, Firewall & Network Configuration , React.js , Next.js , Electron

Database: MySQL, MongoDB, Supabase, FireBase , PostgreSQL

Security & DevOps: Data Encryption, CI/CD Pipelines, Dynamic DNS.

Computers Fundamentals : LINUX , Data Structures

EDUCATION

Bachelor of Technology — Computer Science & Engineering Barkatullah University and Intitute of Technology , Bhopal	2021 – 2025 CGPA: 7.8 / 10
Higher Secondary (Class XII) Anop Higher Secondary School(MPBSE)	2019 – 2020 Percentage: 75%
Secondary School (Class X) Bhartiyam VidhyaPeeth (CBSE)	2017 – 2018 Percentage: 86%

AWARD & ACHIVEMENT

- Employee of the Month** | Conspicuous Solutions| January, 2026 [Certificate](#)

Recognized for outstanding professional performance, dedication, and consistent contributions to the team’s success
